## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 21 and 26-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Shiota (6,169,596).

With regard to claim 21, Shiota teaches a data communication apparatus (see fig. 1) connected to an image storage apparatus (3) via a network (abstract), said communication apparatus comprising: reception means (5) for receiving a print request including ID information identifying an image and an actual print size of the image to be printed (e.g. col. 1, line 44 thru col. 2, line 39); acquisition means (9) for, if the print request includes multiple actual print sizes (reads on col. 3, lines 4-60, the different photos can have different services and size) for the same ID information, requesting one of the multiple of actual print sizes to the image storage apparatus via the network and acquiring image data having the requested actual print size from the image storage apparatus (e.g. col. 1, line 44 thru col. 2, line 39); and generating means (4) for generating print information corresponding to each of the multiple of actual print sizes using the acquired image data (see fig. 1 and e.g. col. 3, lines 15-55).

With regard to claims 26 and 27, the limitations of claims 26 and 27 are covered by the limitations of claim 1 above. The computer code and steps of claims 26 and 27 are covered by the means and functions of claim 1.

With regard to claims 28, the limitations of claim 28 are covered by the limitations of claim 1 above; (e.g. the center server reads on the image storage of claim 1, the resolution reads on the print size of claim 1).

#### Conclusion

2. Claims 22-25 and 29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. Applicant's arguments filed 2/2/07 have been fully considered but they are not persuasive. The added limitations still read on the reference (see details above).

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
